mkessler@lowenstein.com

Mark loves innovators but loathes patent trolls. He applies that passion to bringing much-needed critical strategic guidance to tech-based companies. Mark devotes his practice to clients engaged in creating businesses, launching new products, and conducting M&A and venture capital transactions.

Mark's admiration for innovators was sparked during his years as a client of several law firms, including Lowenstein Sandler. He served as Chief IP, Technology & Sourcing Lawyer globally for JPMorgan Chase, a job he liked, but not as much as he likes working with startups and growth companies. During Mark's eight years at JPMC, he settled multibillion-dollar patent litigation against trolls, handled multibillion-dollar outsourcing agreements, oversaw the merging of J.P. Morgan's intellectual property portfolio with Chase Bank's, and presided over the firm's growing and ambitious patent portfolio.

During his tenure at JPMC, as finance and technology evolved, Mark helped develop a legislative agenda for IP issues involving the financial services industry. His testimony before Congress has influenced a number of patent laws enacted since 1999. In 2005, Mark realized that his greatest professional satisfaction came from serving as IP strategist for the tech companies created at Lab Morgan, JPMorgan Chase's incubator (several of which had successfully gone public). Early in his career, he co-counseled with his friends at Lowenstein Sandler on an emerging tech company, Dialogic. Lowenstein Sandler ultimately represented the company in an IPO and then an \$800 million sale to Intel. When Mark decided to return to a steady diet of tech startups, he spoke with only one law firm...and Lowenstein became his new home.

As chair of the firm's IP Group, Mark is heavily involved in issues relating to software, digital and social media, big data, fintech, open source, virtualization/cloud, blockchain, SaaS, enterprise, and hardware (including medical-related hardware). He continues to manage and assess a wide range of process, software, and business method patents, and he provides strategic advice on issues ranging from litigation assessment to patent scope, open source, trademarks, privacy, and ownership risks.

An electrical engineer by training, Mark started his career at a shoe factory in New Hampshire, his home state, performing a series of jobs that subsequently moved offshore, underscoring the need for America to innovate.

Mark leads several groups focused on startups. He is co-founder and program chair of **VentureCrushFG**, which provides a formal mentoring program and peer group for high-potential tech entrepreneurs (read about it in the **WSJ Accelerators here**). He also co-founded **GrapeArborVC**, an angel investor team composed of friends who pool their personal finances and expertise to back promising tech startups. He is program chair of **VentureCrushAV**, a New York City group of founders, tech industry angels, venture capitalists, and senior executives with an interest in funding and supporting early-stage ventures.

Mark is strongly committed to equality for the LGBTQ community. He is Chair of the firm's LGBTQ Alliance, a vibrant, fast-growing group that advocates on behalf of the LGBTQ community both at the firm and externally. He is also Chair of the firm's Operating Committee.

Outside the office, Mark bikes as much as he can. He enjoys hiking, snowshoeing, jumping in lakes, and cooking with his family. He serves on the board of directors of Camp Belknap, a YMCA-affiliated summer camp in New Hampshire, where he was both a camper and a counselor (and sometimes wishes he still could be), and he serves as a trustee of his alma mater, the School of Engineering at Tufts University. Go Jumbos!

**Bloomberg Law – Big Law Business** cites **Mark P. Kessler** and his team members for tying in third place at the **Diversity in Law Hackathon** at Harvard Law School on June 22, 2018. Kessler's team proposed In.C—short for "inclusive culture"—which aims to help employers track and measure employee feedback on diversity and inclusion factors such as a sense of belonging and shared trust. Used broadly enough, organizations can cite their In.C score to demonstrate to clients, customers, competitors, and the public that they are serious about diversity and inclusion.
- > June 11-12, 2018  
**American Banker** and **PYMNTS.com** quote **Mark P. Kessler** in an article discussing USAA's patent infringement lawsuit against Wells Fargo. In both articles, Kessler notes that this is likely the first time one bank has sued another for patent infringement. In **American Banker**, he indicates that the suit may pressure other banks to reach a quicker resolution with USAA. (*subscription required to access American Banker*)
- > March 9, 2018  
**Law360** quotes **Mark P. Kessler** on obviousness as a barrier to patentability in an article exploring hurdles to securing patents related to distributed ledger technology and blockchain.
- > August 2017  
**Mark P. Kessler** comments in **Technology Transfer Tactics'** monthly newsletter on the various approaches TTOs may consider for managing patent annuity.
