

I International Finance

Our team negotiates and executes complex business transactions and financings, including equity capital raising, debt financing, venture capital investments and fundraising, mergers and acquisitions, and joint ventures, as well as licensing, distribution, and agency agreements, throughout North America, South America, Europe, Asia, Australia, and in more than 20 African countries.

Counseling companies from cradle to grave, we guide technology companies, asset managers, and others from startup through maturity. We assist with initial public offerings and SPACs, going-private transactions, serial acquisitions, and in-court and out-of-court restructurings, in addition to cross-border expansions, with a comprehensive understanding of how to navigate and conduct business for a broad set of industries across international borders with diverse cultures and local or regional business norms.
